Problem Definition Document

1. Problem Statement

Small businesses struggle to convert raw sales data into meaningful insights, leading to poor decision-making and reduced growth.

2. Problem Description

In today's digital economy, businesses generate large amounts of data through sales, transactions, and customer interactions. However, most small business owners lack the technical expertise or tools to analyse this data effectively.

Key Problems Faced by Customers

- Founders spend hours working in Excel but still fail to extract useful insights
- Decisions related to pricing, inventory, and marketing are often based on guesswork
- Advanced analytics tools like Power BI or Tableau are expensive and complex
- No clear guidance on what actions to take from available data

  As a result, businesses:
- Lose potential revenue opportunities
- Face stockouts or overstock situations
- Misprice products
- Fail to understand customer behavior

Target Customers

- Small business owners
- E-commerce sellers (Shopify, WooCommerce)
- Instagram & WhatsApp sellers
- D2C startups without a data team

Customer Validation

From discussions with potential users:

- Most agreed they struggle with data understanding
- They want **simple, actionable insights instead of complex dashboards**
- Many expressed willingness to use (and even pay for) a tool that:
  - Saves time
  - Provides clear decisions
  - Requires no technical skills

3. Ideal Customer Profile (ICP) for your product

Demographics

- Small to medium business owners
- Age: 20–45
- Operating online or semi-digital businesses

Business Type

- E-commerce stores
- D2C brands
- Social media sellers
- Local retail shops adopting digital tools

Pain Points

- Lack of data analysis knowledge
- No dedicated data analyst
- Difficulty using complex tools
- Time constraints

Needs

- Instant insights from sales data
- Easy-to-use interface
- Affordable solution
- Actionable recommendations

Behavior

- Uses Excel or basic tools
- Active on platforms like Instagram/WhatsApp
- Focused on growth but lacks data clarity

Why They Will Use PulseIQ

- Saves time
- No coding required
- Provides ready-to-use business decisions
- Affordable (uses free AI tier)

4. Customer Persona for your product

Figure 1:Interaction with Local Shopkeeper for Feedback

Description:

- Conducted direct interaction with local shopkeepers
- Discussed challenges in managing sales data
- Observed manual tracking methods
- Identified lack of proper analytics tools

The shopkeepers reported difficulty in understanding sales trends and making decisions related to inventory and pricing. Most of them relied on manual methods or basic Excel sheets.

Figure 2:Interaction with Local Shopkeeper for Feedback

Description:

- Conducted direct interaction with local shopkeepers
- Discussed challenges in managing sales data
- Observed manual tracking methods
- Identified lack of proper analytics tools

The shopkeepers reported difficulty in understanding sales trends and making decisions related to restocking products and pricing. Most of them relied on manual methods or basic Excel sheets.
